# Problem Statement

Chhattisgarh faces a significant **skill gap**, especially in **digital** and **technical skills**. Despite investments in sectors like **textile, IT,** and **manufacturing**, many workers remain **unskilled**, leading to **unfilled job positions** and high **unemployment**. An efficient, scalable **skill development solution** is essential for bridging this gap.

# Research Insights

Rural youth in Chhattisgarh face issues like **job shortages**, **skill mismatches**, and a lack of decent **employment opportunities**.

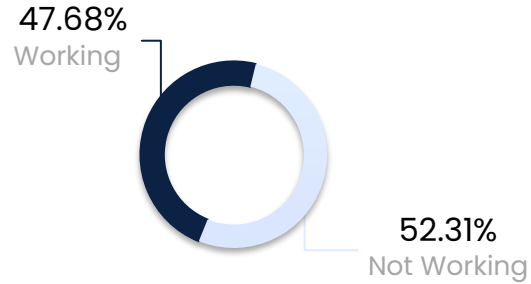

The service sector in Chhattisgarh is characterized by **informal jobs** with **low wages**, lacking **social security benefits** and **job security**.

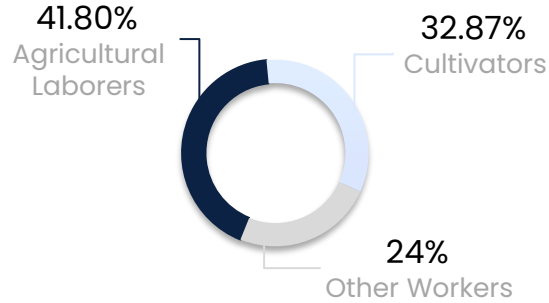

There is a **big gap in education** between **men** and **women** in Chhattisgarh, with **rural women** having **fewer learning opportunities** than those in cities.
